TERMS OF SALE

**2% for cash with order
or 2% 10 days, 30 days net for established accounts.**

Unless otherwise specified, Bulbs will be shipped when dug in the Fall. Approximate earliest delivery date is indicated for each variety.

We will accept orders for spring delivery provided they reach us not later than December 1. Spring orders will be placed in cold storage and shipped as directed at no extra cost until April 1. After April 1 a nominal charge will be made for storage.

All Bulb prices are F.O.B. Lake Grove, Oregon, and are subject to change without notice.

Our wholesale price lists are intended for the trade only. Kindly do not hand them to amateur growers.

In ordering please specify whether shipment is wanted via parcel post, express, or freight. If wanted by post kindly include postage with remittance.

In shipments of 100 pounds or more we find air freight rates to the principal cities cheaper than railway express or equivalent to motor freight rates. In many instances this may be your cheapest and fastest means of delivery.

We will accept Trade orders for direct shipments to retail customers at our regular prices for the quantities involved plus postage and a moderate packing charge. We suggest that such orders be accompanied by the seller's mailing labels properly addressed and such shipping instructions as may be needed.

Orders for growing crops accepted subject to crop failures, shortages, or other matters beyond our control.

Any claims for shortages or errors must be made within five days after receipt of goods as we will not be responsible after that time. We give no warranty, expressed or implied, as to description, quality, productiveness or any other matter in connection with the success of the seeds, bulbs or plants sold by us and will not be responsible in any way in cases of failure, other than to replace bulbs untrue to name. If the purchaser does not accept the goods on these terms, they are to be returned at once.

QUANTITY RATES ON LILY AND MISCELLANEOUS BULBS

25 Bulbs one variety and size at 100 rate.

250 Bulbs one variety and size at 100 rate less 10%.

Wholesale orders cannot be accepted for less than five bulbs of one variety and size except on items priced per each. Where so priced 1 to 25 bulbs will be supplied at the each price, 25 or more at single bulb price less 10%.

Flowering size indicates bulbs which will have flowered at least one season in our nursery. Large or 1st size bulbs are top size for the particular variety.

In compiling this list of northwest grown lilies we have added several varieties of which we have ample stock to offer this season. In addition we grow moderate quantities of a number of other varieties and welcome inquiries concerning any which are commercially available at the present time.

In the following price list we have endeavored to briefly describe all of the stock offered by indicating flower type and size, color, height (maximum average for mature established bulbs) and flowering period under Northwest climatic conditions.

LILIES

For Garden and Greenhouse

Our 1960 catalogue contains the most comprehensive collection of Northwest grown Lily species and hybrids which it has been our good fortune to assemble after 30 years of specialized work with this magnificent and increasingly popular genus. The new introductions this year are all outstanding in beauty and can be offered with confidence after a number of years of testing under varied growing conditions. Other stock includes Hardy Cyclamen, Erythroniums, Trilliums and a number of miscellaneous bulbs and roots and seeds. We wish to thank our customers for their support for over a quarter-century and to assure them of our continued efforts to ship only the best of stock available remembering that each order is our personal responsibility.

1960 INTRODUCTIONS

L. AURATUM EXTRA HARDY FORM—This variety is native to the far northern part of Japan and has exceptional value in climates subject to late spring frosts and a generally short growing season. Top growth is not produced until late spring after which the plant makes very rapid progress, flowering on 3 to 4 ft. stems in late July. Maturity is reached quickly in early fall before heavy frosts. The flowers are very large bowls brilliantly spotted crimson on white, with broad petals similar to var. *Platyphyllum*.

L. BRIGADIER HYBRIDS (Grenadier x Yellow Purity)—A greatly improved strain of upright and outward facing lilies derived by crossing the original clone of Grenadier with *Elegans Yellow Purity*. The flowers are large and of heavy substance varying in flowering time from mid-June to mid-July. The foliage is thick and glossy, somewhat similar to *Dauricum Wilsonii* (one of the parents of Grenadier) and the flowers are carried in rather a semi-umbel on stout stems from 2 to 3 feet tall. The color varies slightly in a short range of deep apricot shades, lightly spotted deep mahogany or maroon.

L. CELESTIAL HYBRIDS—A galaxy of new hybrid strains of outstanding beauty and vigor, the Celestials are the result of many years of hybridizing effort and selection. All bulbs are carefully chosen at flowering time to eliminate any inferior types or colors leaving only the best as representative of the three strains introduced as follows.

DIANA—Flowers are large semi-trumpet or bowl shaped with expanded petals. Colors vary from white or cream ivory with yellow or apricot centers to those which are entirely yellow or soft golden orange. Some are pure white lightly spotted purple near the center of the petals. These hybrids are the offspring of successive crossings of the Temple Hybrids x *Henryi*. Diana has received many high awards at lily shows. Height 4 to 7 feet. Mid-July and August flowering.

HELIOS—Symbolizing the mythical Sun God whose name they bear, these lilies have large size trumpets of colors varying from sulphur-yellow to warm orange-yellow. All of the Helios seedlings have colored exteriors which may be pink, amethyst, reddish-brown, or olive. Lily enthusiasts who prefer yellow trumpets with a dash of color will find these specially suitable. Selected crossings of Sun Temple seedlings are the parents of Helios. Height 5 to 7 feet. July and early August flowering.

VESTA—Selected seedlings with open flowers of medium to large sizes originating from intercrosses of *L. Henryi*, their hybrids, and all of the Temple Hybrids. Colors are attractive pastels of orange, yellow, cream, or white. Petals are either gracefully reflexed, flatly opened, or rolled and twisted spirally. Carries large number of buds and has a very long flowering period. In competitive lily shows, exhibits of Vesta have rated highly in awards received. Height 4 to 7 feet. Mid-July and August flowering.

L. CENTENNIAL HYBRIDS—An exceptional strain of *Auratum-Speciosum* Hybrids derived from second generation crosses of selected forms of *Auratum* and *Speciosum* and their hybrids such as *Jillian Wallace*, the *Potomac Hybrids* and others. The flowers are broad petalled, wide open bowl shaped, slightly recurved at the petal tips. The colors range from bright pink to carmine red generally spotted deeper pink or red and margined white. Unlike the red banded forms of *L. Auratum* the colors do not brown with age. The stout stems rise to four or five feet and the flowers measure up to 10" across. Flowering time early to mid-August.

L. CENTIFOLIUM TEMPLE HYBRIDS—

FASCINATION—A select group of the very finest trumpet lilies chosen from many thousand Marble Temple Hybrids. Although the basic color is white, many are softly tinted with various shades of either lilac, yellow, or green. Each lily is different. Their beauty should captivate the interest of anyone who is fond of trumpet lilies. Height 5 to 7 feet. July and August flowering.

PEARL TEMPLE—Lustrous pearly white describes the trumpets of this Temple Hybrid. Its appearance is attractively clean and free of any other coloring except for the yellow throats found in many of them. Pearl Temple is taller, carries larger trumpets, and flowers later than Regale Album. Height 5 to 7 feet. July flowering.

TEMPLE BELLS—This lily, an ornamental novelty, has received awards at every lily show in which it has been entered since 1954. It has not been offered to the trade until at present, because of its scarcity. The large trumpets, which are sometimes flared, are grouped closely together at the top of the stem and suspended in a nearly pendant position like swaying bells. Temple Bells is offered in white and assorted color variations similar to all types found in the other Temple Hybrids. The original parents of these new hybrids were L. Marble Temple x L. Vesta. Height 4 to 7 feet. Early July to mid-August flowering.

TOPAZ TEMPLE—These tall trumpet lilies are very colorful with a wide variety of interesting shades of light yellows. Individual plants vary from light mimosa yellow to light apricot. All of the colors are delicate pastels and like the other Temple Hybrids, most of these lilies have various shadings on the trumpet exteriors. A hybrid strain derived from intercrossings of Sun Temple and the Celestial Hybrids. July and August flowering. Height 4 to 7 feet.

L. LEICHTLINII—This true citron yellow flowered species has been very scarce until the present time. Seed grown stocks are now available of this outstanding species, the 3 to 5 foot stems of which carry a number of bright yellow, medium sized, recurved flowers, dotted dark mahogany. July flowering.

L. NAVAJO GOLD—A group of hybrids derived from crossing L. Navajo with Goldflake. The resulting strain consists of plants carrying golden and apricot flowers on 3 foot stems, slightly recurved, outward facing to semi-upright. These lilies produce a large head of flowers, showy and long lasting during mid-July. They are extremely hardy and of easiest culture.

L. SPECIOSUM CINDERELLA—A completely new color form of this popular lily. The flowers are blush pink at base, shading gradually to almost white at the petal tips, spotted deeper pink, the entire blossom suffused with delicate peach. A very hardy variety which has been thoroughly tested for garden and cut flower use. August flowering. 4 to 5 feet.

L. SPECIOSUM ELLABEE—A large flowered pure white variety with pea-green star at base of bloom, this lily is the result of over 10 years selection from many seedling white speciosums. An exceptionally vigorous grower, bearing 14 to 16 flowers per stem in the field and up to 22 under glass. Its heavy texture extends its keeping qualities to fully ten days or longer when cut. August flowering. 4 to 5 feet.

L. SPECIOSUM GRAND COMMANDER—A new red Speciosum outstanding in color, plant vigor and flower size. The large heavy textured flowers are a glowing crimson red, with pure white petal edging, spotted deep blood red at the base. A strong growing, hardy clone which produces a very impressive showing in flower. August flowering. 5 to 6 feet.

L. SPECIOSUM LUCIE WILSON—This outstanding clone has become one of the most popular speciosums in existence since its original introduction some 15 years ago. The erect stems rise to a height of 5 to 6 feet and carry numerous lightly scented soft pink recurving flowers, margined white and spotted deep rose. The blooms are large with excellent keeping quality. In the garden the plants will carry flowers up to 3 weeks during August, blooms lasting for 10 days in water after cutting. The foliage is a lustrous deep green, broad and heavy textured.

L. STARLITE (Henryi x Aurelian) x Sulphur Trumpet—A new introduction from the hybrid stocks of Dr. E. F. Palmer and a sister seedling of Sundance. The flowers are large, bowl shaped, carried on stems from 5 to 6 feet tall. The color is a bright sulphur yellow shading to greenish gold at the base. The blooms are unspotted with mahogany brown anthers. An outstanding lily, flowering late July to early August.

LILY HYBRIDS

The Aurelian Hybrids—Flower Types contained in this group comprise three distinct forms as follows:

CORONAS—Reflexed or recurved in varying degrees. Petals of medium width. Moderately tall plants producing flower heads excellent for cutting as well as garden decoration.

FLARES—Large, wide flaring flowers intermediate in form between Trumpet and Recurved. A very distinct flower type with a brilliant color range.

TRUMPETS—True Trumpet shaped flowers on medium to tall stems. The flowers are large and of heavy texture.

The above three Types are subdivided into select color strains as offered below. The color strains are carefully selected at flowering time to eliminate any off colors or inferior blooms.

In addition we offer several select clones in the Aurelian group and a strain of special select semi-bowl and semi-recurved types in pastel colors.

The Centifolium — Temple Hybrids — The countless variations of flower shapes and color tones of the Temple Hybrids are fantastic. Each plant has an individual beauty unlike all the others. This constantly improving strain of tall trumpet lilies is the product of many years of selective hybridizing of the native species of China and Burma. All of the Temple Strains are selected seedling bulbs which are marked separately during the flowering season each year.

Amethyst Temple — Massive trumpets varying in color from light amethyst pink to deep columbine red. Both the light and dark selections are rich and clear in this amethyst color and are free of any distracting brown overtones. The pink and amethyst shading is on the interior as well as the reverse of the petals. 'Splendid for cutting or in the garden. In warm sections, planting in light shade is preferable to avoid bleaching. 5 to 7 feet. July flowering.

Marble Temple—All of these choice lilies are unusually beautiful, strong growing, and very resistant to disease. The varying tones of lustrous white, ivory, or cream-white with the contrasting exterior markings resemble the colors seen in the finest marble. The large trumpets vary in their external color from pink, red, burgundy, brownish-purple, fawn, olive, cream-yellow, green, or to many multi-colored variations. The centers are yellow, light green, or pure white. Some trumpets are funnel shaped; others are more open with rolled petal tips; and some are bowl-shaped with expanded or slightly twisted petals. 5 to 7 feet. July and early August flowering.

Sun Temple—The new Sun Temple Hybrids are now one of the most remarkable of all yellow trumpet lilies. Seen with other yellow trumpet lily strains, their distinct color at once stands out as bright, clean, and uncluttered with other clashing exterior markings. From near or afar, they look yellow and are yellow inside and outside. Their uniform color spectrum is from lemon yellow to primrose yellow. Some are faintly marked with a narrow soft green exterior rib, but this shading blends well with the yellow and does not offer an unpleasing contrast. Sun Temple is also very vigorous in its growth and its color holds up well in hot summer weather. July and August flowering. Height 5 to 7 feet.

SALES AIDS

Our "Reference Chart of Lilies for Garden and Greenhouse" contains over 2000 items of cultural information covering most of the commercial lilies. Single copies are available to the wholesale trade at .85 each postpaid. Retail price 1.25. On request we are prepared to quote quantity prices on the chart for resale. A number of our customers are offering it in their catalogue listing lilies.

"Basic Lily Culture," our new pamphlet of information for both the novice and experienced grower, is designed to answer the questions most usually asked concerning the successful cultivation of hardy lilies and is based on over 25 years experience with the genus. Copies may be secured at a cost of 8 cents each in any quantity up to 100. We will be pleased to quote prices on larger quantities upon request. We feel that it will be of material benefit to the Trade to include these instructions with all retail lily orders, particularly to customers who have had limited or no experience in Lily culture. A successful beginning will most likely assure repeat orders in future years.

"Hardy Cyclamen Culture," a leaflet of complete instructions on growing these popular plants will be included with all cyclamen orders. Additional copies will be supplied at 7 cents each.

We will also include with each cyclamen order a copy of our new color display card. This card is designed to assist in the sale of these plants by mentioning their chief attributes in concise, quickly readable form. We suggest using the card with displays of cyclamen corms or plants either for nursery or counter sale. Additional copies are available on request.

As mentioned in our previous Trade lists, we now have available a new set of color transparencies for lecture and sales aid use. This set has been expanded during the past years and the list now includes over 250 subjects from which to choose. These photographs can be supplied as slides (2 x 2), enlarged transparencies in sizes 2¼ x 3¼ and larger, or as color prints. A complete list of subjects available and details of their cost will be sent promptly upon request. In corresponding kindly advise whether slides, enlarged transparencies or prints are needed and approximate quantity.
